Baby health checks start before they're even born. Here are some questions you may want to ask your healthcare provider about antenatal testing.

- Ask about the standard antenatal tests—what are they and what do they look for?
- Ask if there are any other tests that may be relevant based on your age and medical/genetic history.
- Ask when the antenatal tests will be carried out. **See our checklist of Questions to ask at your 12-week scan, when you get there.**
- Ask how the antenatal tests are carried out.
- Ask if it's OK to bring someone for support.
- Ask how long the results take to come back.
- Ask about the level of accuracy of each antenatal test—it can vary.
- Ask for support or therapy if you need someone to talk to.
